Dear Manfred:

I have been a bit slow in replying to your letter of June 19th - for the usual reason. Again, I have been at Enewetak and returned to find a large amount of mail.

I have made a copy of your letter and enclosure for Bill Robison at LLL - first because he will find the preliminary data interesting, but also because he has now the most complete and current Enewetak dose and dose-rate information. By copy of this letter I'll ask him to reply direct to you.

I shall be most interested to hear of your further evaluation in this matter. Have you not seen the ridge pattern in Runit rats? or on Boken and Enjebi?

Please let me know if I may be of further assistance.

Regards,

Roger Ray
Roger Ray, Assistant for
Pacific Operations
